NimbusID®
Cognitive Identification

Security Beyond Passwords

The Company
NimbusID is a privately held technology company founded in 2012 by Alex V. Natividad, MD. We were formed to commercialize our Cognitive Identification software solution, conceptualized and patented by Dr. Natividad. We are in the Physical Identity Verification space working with IT and cyber security partners around the globe.

Our Business
The NimbusID team has three core business units - Cognitive Technology Development, Product Integration and Sales & Marketing. We are primarily focused on software licencing agreements and end user integration sales and support.

Fundamental Identity Challenge
From governments to corporations right down to the smartphone user, everyone faces the same daily challenges of stolen, shared, misused or hacked identities. There are fundamental security flaws in how we verify the identity of people before giving them access to our digital world. How can we be assured only the rightful people are gaining access to the Internet of Things? If we want certainty and confidence in our security, would a Physical Identity Verification solution work for us?

AIRnID as a Solution
The NimbusID solution is called AIRnID. We are experts in the development of Cognitive Identification technologies to verify physical people who rightfully own access to networks, devices and apps. Our solution assures tasks can only be transacted by verified individuals. With online identity crimes costing society hundreds of billions annually, experts estimate security spending will exceed 3 trillion dollars globally over the next 5 years. NimbusID with our AIRnID solution is uniquely positioned to dominate the Physical Identity Verification space.

Problems We Help Overcome
AIRnID plays a pivotal role in the new IT and cyber security ecosystems. Problems we help overcome are Insider Threat, Transaction Fraud, Advanced Persistent Threats, Malware, Hackers, Trojans, Shared Credential Use, Asset Management, Privileged Access and most importantly, Stolen login/password credentials.

Who Benefits
Primary sectors for AIRnID are ISP's, Android Devices, Medical/Health, Financial, Military, Insurance, Online Commerce, Engineering, Corporate, Gov't, Nation State, Blockchain, Network Access, Command and Control, Critical Infrastructure &Brand Protection.

Your Life, Your Mind, Verifying Your Identity
